The McWhorter School of Building Science at Auburn University seeks applications for a non-tenure track Lecturer/ Senior Lecturer. The position has a one-year term with the possibility of extension. The successful candidate would teach construction coursework in the undergraduate program and participate in service activities that support students in the School.

The school is housed within the College of Architecture, Design and Construction. The College of Architecture, Design and Construction was established at Auburn University in 1907. It is the oldest in the Southeast and one of the oldest in the United States. It is comprised of the School of Architecture, Planning and Landscape Architecture, the School of Industrial Design and Graphic Design, and the McWhorter School of Building Science. The college is committed to collaboration across these disciplines. For more information on the college see http://www.cadc.auburn.edu.

The McWhorter School of Building Science at Auburn (BSCI) was established in 1947, it has more than 3,500 graduates, including many who lead the construction industry in the Southeast U.S. The school is currently comprised of 15 full-time faculty members and a student population of approximately 500 students. The school maintains a proud tradition of practical and professional construction education, offering both Bachelors and Master’s Degrees in Building Construction.

The school’s facility was the first in Alabama higher education designed to LEED standards, and it received a “Gold” rating by the U.S. Green Building Council. It provides a progressive learning environment for faculty and students to explore solutions to challenges facing the construction industry. The school is guided by close ties with a supportive industry. Substantial recurring funds have been committed to support the school in its mission to deliver the highest quality construction education experience possible. For more information on the McWhorter School of Building Science, see http://www.cadc.auburn.edu/bsci.

The individual in this position will be expected to be on campus during the academic year to: 1) teach students in accordance with the University mission, 2) collaborate with faculty and students in BSCI and other disciplines, and 3) interact with construction industry organizations and individuals. Salary will be based on a nine-month academic year appointment.

Required qualifications include: Master’s degree in Construction Management, Architecture, Engineering, or a related field, with a minimum of 5 years’ experience in the US construction industry; or Bachelor’s degree in Construction Management, Architecture, Engineering, or a related field, with a minimum of 10 years’ experience in the US construction industry.

Applicants should have a demonstrated background in and be prepared to teach in some of the following areas: Safety, Quality Control, Sustainability, Virtual Design and Construction, Mechanical & Electrical Systems, Project Management and Field Supervision.

Desired qualifications include: evidence of progressively responsible industry experience over the applicant’s career, evidence of effective communication, significant U.S. construction experience, professional registration or contractor’s license; certification and/or credentials, capability of incorporating information technology into the classroom.
If you would like to join a talented, dedicated and collegial faculty in a progressive learning environment for construction education, apply online at the following URL:
