TO LEARN MORE ABOUT THIS GREAT OPPORTUNITY

DATE: Friday, November 7
TIME: 8:00 AM – 1:00 PM (free breakfast & lunch)
LOCATION: M. Miller Gorrie Center
RSVP: jal0021@auburn.edu

ABOUT THE PROGRAM
The Master of Building Construction (MBC) program is designed to provide advanced construction education for those who hold an undergraduate construction degree or for those who are making a career change and hold an accredited undergraduate degree in another discipline. Enrollment in the program, however, is limited and is awarded on a competitive basis. Class sizes are small and typically involve extensive interaction with industry professional and hands-on problem analysis. Opportunities for graduate internships, travel-based study programs, school-supported student research, and customized educational plans are vast.

The McWhorter School of Building Science has been a leader in construction education for over sixty years and maintains an excellent reputation with industry professionals around the country and internationally. The Master of Building Construction (MBC) degree has been offered since 1993. Our faculty is comprised of construction management professionals, civil engineers, architects, and attorneys. The program maintains a proud tradition of practical and professional construction education. In recent years, the placement rate for our graduate students has been exceptional, and there are opportunities in all sectors of the industry.
