Construction Management Summer Academy for Young Women

June 9-13, 2020 | Rising 11th-12th grade

This 5-day camp is geared toward students interested in learning about the exciting and diverse career opportunities available in construction management. During this program, students will:

- Learn about key topics in the industry: project management, field operations and preconstruction
- Complete activities incorporating construction drawings and materials/methods
- Interact with McWhorter School of Building Science faculty, industry professionals and current Building Science students
- Discover professional career options in construction
- Engage in hands-on construction experiences

Program is FREE for accepted students!
