cv [aug 2024]

education

master of landscape architecture, auburn university [2023]

bachelor in architecture, universidad de los andes [2018]

professional experience

visiting assistant professor, auburn university [2024 - present]

_MLA graphic studies II [fall 2024]

research associate, auburn university [jan 2024 - present]

research assistant, auburn university [aug 2021 - dec 2023]

responsibilities

_GIS mapping, data collection and processing

_Literature review (scientific papers, reports, studies, news)

_Elaboration of landscape architecture drawings (maps, diagrams, axons, renderings)

_Site analysis and fieldwork documentation (Humboldt Bay, San Francisco Bay, Mobile Bay, Perdido Bay, Grand Bay, Escatawpa River, Florida Forgotten Coast, Savannah River, Southern Texas)

_Contribution to nature-based infrastructure design concepts

_Preparation of material for stakeholders meetings

_Participation in design workshops

_Preparation of reports

_Elaboration of a wetland plant communities field guide for Fort Morgan Peninsula

_Communication across universities and teams

selected projects

_Natural Infrastructure Innovation Project [jan 2024 - present]

design research centered on the development of innovative nature-based design concepts to address environmental challenges and amplify ecological and cultural opportunities of coastal infrastructure

Funded by U.S. Army Engineer Research and Development Center (ERDC)

Auburn University in collaboration with University of Virginia and University of Pennsylvania

_Four Coasts [aug 2021 - present]

design concepts for incorporating nature-based approaches into the Army Corps dredge work in selected districts on the Gulf Coast, Atlantic Coast, Great Lakes and Pacific coast

Funded by U.S. Army Engineer Research and Development Center (ERDC)

Auburn University in collaboration with University of Virginia and University of Pennsylvania

_Surface Transportation, Sea Level Rise, and Coastal Storms: A Sustainable Path to Increased Resilience [may 22 - present]

studying and visualizing the social and ecological benefits of nature-based infrastructure beyond reduction in SLR impact on transportation infrastructure in Fort Morgan Peninsula, Alabama

Funded by National Oceanic and Atmospheric Administration, Effects of Sea Level Rise

(ESLR) program

architect, ministry of sports of colombia [feb - jun 2021]

responsibilities

_Technical assistance to more than 25 local governments for sports parks and recreational projects

_Contribution to the drafting of funding application guidelines for construction and maintenance of recreation projects
